

IT'S OUR
PLEASURE

to make your Piaggio
look extraordinary

Piaggio Ape 400 Classic

Basic version

It is our utmost pleasure to present our latest product, which is the Piaggio Ape with customized interior dedicated for food industry. This little vehicle is ideal for any type of venture regardless of the season or weather conditions. It is a perfect alternative for food carts/bikes, especially because of practicality and ease of transport.

Piaggio Ape 400 Classic

dedicated for ice cream

The interior is adapted for selling ice cream from one of the sides of the truck. It is equipped with a professionally customized refrigerator with a space for 8 ice cream tubes (7,3 liter each). It means that the whole appliance is able to store approximately 36 kg of ice cream. Bearing in mind severe working conditions, as mentioned above, the refrigerator is specifically adapted to working outdoors (in high temperatures). Therefore, the cooling system is additionally enhanced. The electrical control panel enables work between -10 and -21 Celsius.

Exterior

1. White tires
2. Easily accessible shelves/storage compartments.
3. Wooden table partition
4. Sanitary facilities
5. Space for various arrangements (customer's perspective)
6. Decorative elements of Calessino model

This version of Piaggio Ape (devoted to sale of ice cream) is also equipped with electrical installation and sanitary facilities. It comprises two-compartment sink, instant hot water faucet and two big water canisters (13,5 liters each) for drinking water, as well as, wastewater. When it comes to electrical installation, all the applied solutions enable proper work of the remaining appliances (including the ice cream refrigerator). This particular version is equipped with two batteries (type AGM) with capacity of 120 Ah each. It is possible to increase the capacity up to 200 Ah.

The interior of Ape 400 can have two types of the working table. The basic version includes stainless steel, which is required by the sanitary-epidemiological station¹. Optionally, the table can be made out of any kind of wood. Sanitary facilities (e.g. two-compartment sink) are separated by a piece of solid wood or a plastic element, which enables maintaining the highest level of aesthetics and hygiene.

¹ The following rule applies to Poland. For other countries, information has to be checked directly with an appropriate office.
